DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bertness (Us 6,316,914) in view of Applicant's own admitted art on page 11. The references do not explicitly disclose an integral torch/light to illuminate the area of testing. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have integrated the light onto the testing probe, since it has been held that the constituent parts are so combined as to constitute a unitary whole. Webster's New International Dictionary (2nd Edition) defines "integral" as "(2) composed of constituent parts making a whole; composite; integrated." Therefore the use of a one piece construction instead of the two or more pieces would be merely a matter of obvious engineering choice. *In re Larson*, 144 USPQ 347 (CCPA 1952); *In re Fridolph*, 50 CCPA 745, 89 F.2d 509, 135 USPQ 319.

Response to Arguments

Applicant's arguments filed 7/10/06 have been fully considered but they are not persuasive. Applicant's amendment to further narrow the claims to include the

orientation of the probe light is not patentably different that the previous claims. It is obvious that the light must be directed toward the object being pointed at otherwise it would defeat the purpose of mounting the light on the probe in the first place.

Conclusion

This is an RCE. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
